

## The interactive Directory and 3D Wayfinding Solution

All information now available with a simple touch  
Routes, new products, sales offers, events

itNerus is an application designed for interactive displays and kiosks

User friendly and attractive, itNerus is the ideal tool to help users to orient themselves, learn and move in large shopping malls, airports, train stations, museums, hospitals, exhibitions and other complex events. The graphical interface was developed with the aim of being simple, intuitive and usable by all.

## User Interface

Whether routes, news, events, promotions, or other...

itNerus improves the availability of your information and provides a range of exclusive services with ease and clarity.

### User-friendly interface

- The user interface can be easily adapted to the customer requirements.

### The main map is in real 3D

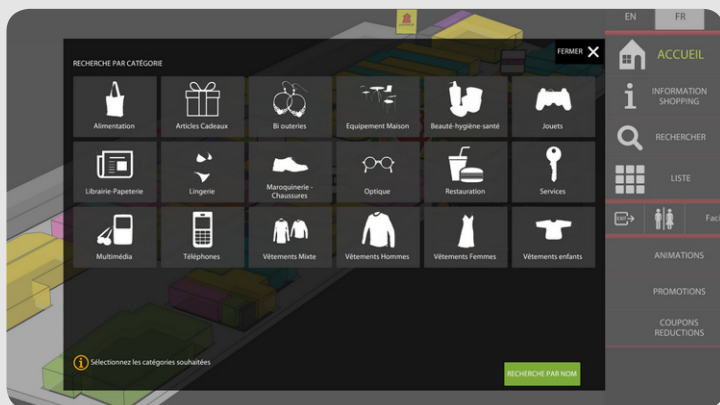

- The user can rotate, move and zoom in real time.

### Search Point of interest (POI)

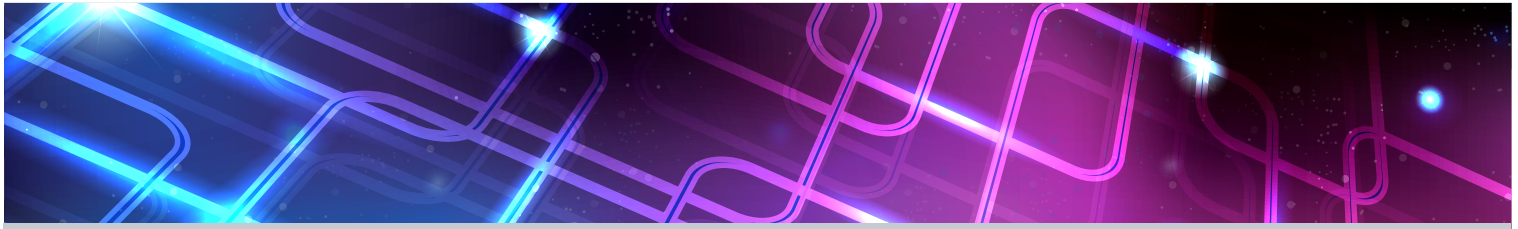

- Search by categories
- Search by name
- or through a full list

### Access to the Site information and their planning

- Shows
- Events
- Animations

## Access to the shopping promotions

- Discounts
- Couponing & QR code
- Internet media

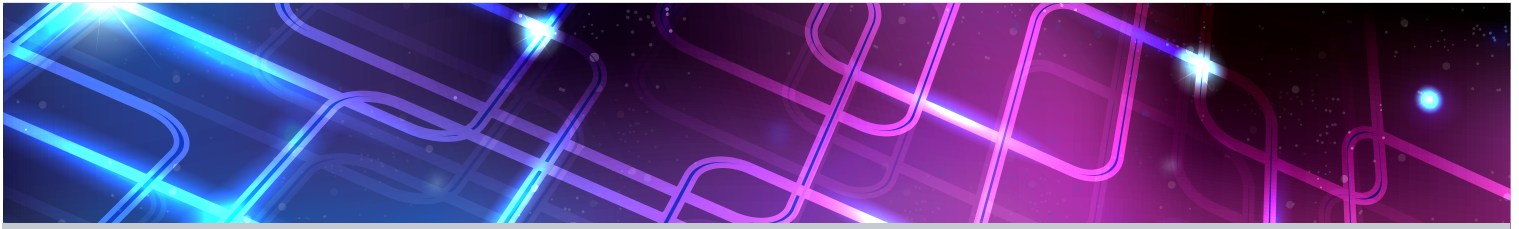

## Multi language module

- The interface and the media can be available in different languages

## 3D realistic virtual tour

- The 3D realistic virtual tour is displayed in real time (not based on pre-generated videos neither flash)
- Ability to walk virtually in the 3D model and to interact with the POI's.

## Content management & Support

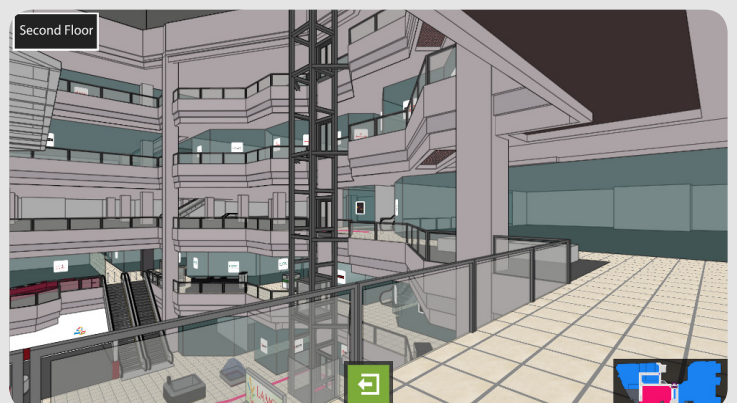

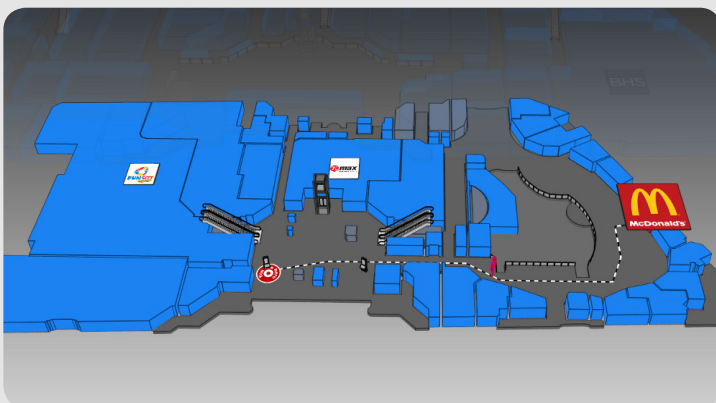

itNerus is delivered with an «All-in» service contract, including the content management, the support, and monthly usage statistics report.  
All the changes requested are submitted within 48 hours maximum.

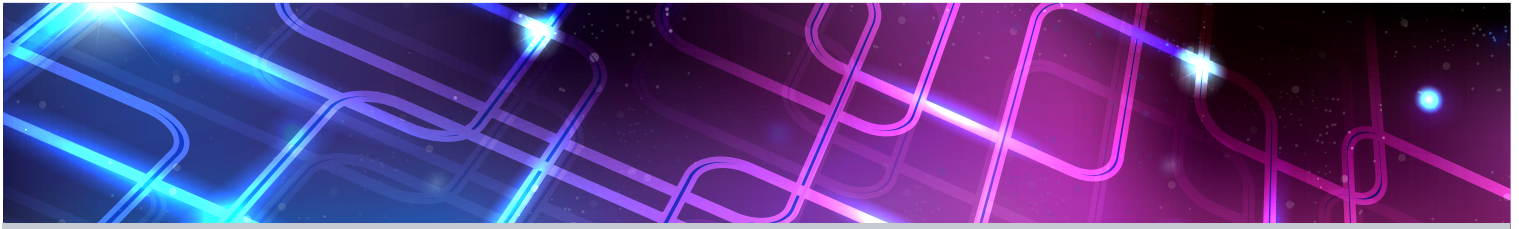

- POI's modifications (name, logo, assigned categories, discount, color...).
- Storefronts\* in the realistic 3D tour.
- Site information (events, animations or any communication).
- Selection colors, sizes, links/ways to POIs...
- Advertising, promotions, agenda, sales offers, couponing, QR codes.

**With itNerus, your interactive kiosks are always updated with the last information.  
at No extra cost!**

### Compatible with a lot of multimedia formats
